DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 25-28, drawn to a method of detecting the presence of or predisposition to obesity.

Group 2, claim(s) 29, drawn to a method of assessing the response of a subject to treatment of obesity or an associated metabolic disorder.

Group 3, claim(s) 30, in part, drawn to a method for treating or preventing obesity comprising administering a functional MAP3K11 polypeptide.

Group 4, claim(s) 30, in part, drawn to a method for treating or preventing obesity comprising administering a nucleic acid encoding a functional MAP3K11 polypeptide.

Group 5, claim(s) 30, in part, drawn to a method for treating or preventing obesity comprising administering an agonist or an antagonist of MAP3K11.

Group 6, claim(s) 30, in part, drawn to a method for treating or preventing obesity comprising administering an antisense or a RNAi of MAP3K11.

Group 7, claim(s) 30, in part, drawn to a method for treating or preventing obesity comprising administering an antibody or a fragment or derivative thereof specific to a MAP3K11 polypeptide.

Group 8, claim(s) 31 and 32, drawn to a method of selecting a biologically active compound on obesity and associated disorders.

2. The inventions listed as Groups 1-8 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each is drawn to a method that does not have

Art Unit: 1634

features in common with the other. Groups 1 and 2 both involve MAP3K11 assay, but to accomplish different ends. The MAP3K11 nucleic acids and proteins were known in the prior art and therefore are not a special technical feature that joins the inventions (see Ing et al. provided in the IDS). Further regarding groups 4-7 each of these groups has a distinct process step which involves the administration of compounds that are structurally unrelated to one another. And finally, group 8 does not share any steps in common with the other groups.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
